

How Intravenous (IV) Therapy Works

IV Therapy consists of infusing vitamins, minerals, amino acids and antioxidants directly into your bloodstream, allowing these nutrients to flood your cells. By bypassing the digestive tract, you receive 100% of the nutrients given, and we can adjust your concentrations and ingredients to give you precisely what your body needs.

IV Therapy provides your body with nutrients needed to regain self-healing

Many Reasons to Consider IV Therapy

- Vitamin & Mineral Deficiencies
- Immune System Support/Enhancements
- Cardiovascular Disease/Atherosclerosis
- Weight Control
- Pre/Post Surgery
- Anti-Aging
- Mental Health
- Insomnia
- Brain Health
- Chronic Disease
- Leaky Gut Syndrome
- Gut Issues
- Lymes Disease
- Acute Illness
- Viral Illness
- Asthma/COPD
- Cancer
- Detoxification
- Heavy Metal Detoxification
- Tissue & Wound Healing
- Neurological Diseases
- Autoimmune Disease
- Neuropathy

How to Get Started

Your journey begins with a wellness consultation, in which we will obtain your health history and baseline blood tests to assess kidney and liver functions. Based on your needs and health goals a customized protocol will be formulated.

What We Offer

IV Therapies

Myers Cocktail

Named for the late John Myers, MD, this therapy consists of B vitamins, Calcium, Vitamin C and Magnesium. It has been used for years to aid in the treatment of chronic medical conditions like fatigue, migraines, fibromyalgia, gut issues, malabsorption, asthma, and tick-borne diseases.

Glutathione

One of the strongest antioxidants in the body, glutathione can be given as a stand -alone infusion or can be given after the completion of other infusions. It helps to combat stress and decrease inflammation in the body. It is a strong detoxifier and can improve metabolic function.

High Dose Vitamin C

Given at lower doses, Vitamin C is known as an antioxidant, but at higher doses (10-75 grams IV) it induces a pro-oxidative effect, which may be helpful in targeting chronic illnesses due to viruses, bacteria or cancer.

Amino Acids

Provides brain detoxification, glucose tolerance improvement, immune system support, weight control, helps with depression, insomnia, and most all chronic diseases.

H₂O₂ (Hydrogen Peroxide)

Considered a universal treatment as it increases oxygen availability to tissue. Used to treat many disease conditions.

NAD (Nicotinamide Adenine Dinucleotide)

Used for alcohol & opioid detoxification, fatigue, Lyme, MS, Parkinsons & mitochondrial regeneration (wellness).

Chelation

Removal of heavy metal toxicities such as lead, mercury, and others. Chelation can also be beneficial in cardiovascular disease, atherosclerosis, diabetes and other circulatory disease by potentially decreasing inflammation and reducing plaques in the vessels. This is accomplished by removal of heavy metals and through biochemical interactions of nutrients.

Phosphatidylcholine

Improves liver damage, post stroke recovery, cardiovascular disease, memory and cognitive decline.

Iron

Used to treat iron deficiency anemia that can cause fatigue, lethargy and low energy

IV Nutrient Blends

Brain & Energy

B Vitamins and Taurine

Enhances brain function to allow for better memory, cognition, attention, decision-making and problem solving.

Chill

Amino Acids, Magnesium, Taurine, Glycine and B Complex

Relaxes the muscles and the mind for stress reduction and supports restful, high quality sleep.

Detoxify

Methionine, Inositol, Choline, B Vitamins, Taurine, Glutathione

Supports liver detoxification, so it is a great addition to a weight loss or detoxification program.

Easy Calm w/ Refresh

Trace Minerals

Maximize physical and mental performance throughout the day.

Endurance

Amino Acids, Taurine, B Vitamins, Magnesium, L-Carnitine, Electrolytes

Enhances muscle function and lean muscle mass. This formula is for athletes or someone preparing for a sports competition or endurance event.

Glow: Skin Hair & Nails

Vitamin C, Glutathione, B Vitamins, Biotin, Amino Acids

Provides valuable vitamins to support collagen production while improving the overall look and function of skin, hair, nails and eyes.

Hangover

Zofran, B Vitamins, Toradol with 1L of fluid

Relieve side effects of alcohol consumption along with hydration.

Metabolism Boost/ Slim Down

Methionine, Inositol, Choline, B Vitamins, L-Carnitine, Magnesium

Supports fat degradation, lean muscle mass and energy production. This is a great addition to a weight loss program or to give a jumpstart to plateaued weight reduction.

Migraine

Magnesium, Vitamin C, B Vitamins, Zinc, L-Carnitine

Subdues the overactive nerve endings to calm the irritation that initiates a migraine attack. Once those proteins are blocked, it stops the cascade of events that results in migraine pain.

Nourish

1L fluids

Provides hydration after strenuous exercise, a gastrointestinal illness, or a night out.

Rehydrate Plus

Large doses of fluids, B vitamins, zinc, Glutathione and Electrolytes

Provides hydration and supports liver detoxification.

Super Immune Boost

Vitamin C, Zinc, B Vitamins, Glutathione

Boosts the immune system for acute and chronic infections. Excellent for an upper respiratory illness, cough or urinary tract infection. Has extra Vitamin C and glutathione for additional antioxidant and cellular support.

Wellness Boost

Taurine, B Vitamins, Amino Acids, Engystol

Restores energy and fatigue for someone looking for a quick boost with an antiviral.

We offer IM injections of vitamins & minerals as well.
